PROJECT EXPERIENCE

King County Tableau Dashboard | County of Los Angeles | Los Angeles, CA

January 2024

- Developed and designed an interactive dashboard using data visualization techniques to analyze and present average house prices, heat maps, and distribution patterns of bedrooms, bathrooms, and overall house prices in King County
- Implemented user-friendly features, including filters and interactive elements, to enhance the accessibility and usability of the dashboard, fostering a deeper understanding of the complex data related to King County house prices

Time Series Data Analysis | UCLA, ECON 104 Data Science | Los Angeles, CA

November 2023

- Processed and cleaned data, addressing missing observations, conducting tests for seasonality, and applying differencing techniques to account for it
- Implemented AR and ARDL models on the data, selecting the optimal model based on the criterion of the lowest AIC
- Implemented R commands to generate clear and concise PDF reports

Table Joins and Meta Data Analysis | UCLA, GEOG 181A Intermediate GIS | Los Angeles, CA

October 2023

- Consolidated data by merging 12 columns from 4 spreadsheets into a single, organized spreadsheet using QGIS, geospatial information application, facilitating enhanced analysis
- Conducted analysis on metadata, examining thousands of rows to identify missing coordinate systems across 10 distinct data files
